FASS GARDENS

RARE NEW HEMEROCALLIS

These lilies have undergone a period of development in the past few years, causing much excitement in the great flower world. Astounding new colors and combination of colors have been created by the great efforts of hybridizers. The breeders have given us size, substance and branching. Daylilies now rank number one in the perennial field. They can be grown in any part of the country, tolerating all sorts of weather conditions.

CULTURE

Daylilies are very easily grown without any fuss or coddling, but like any other flower if one would like fine giant blooms, it is best to grow them in a well drained soil. Add plenty of Oak leaf-mold or cow manure and a handful of bone-meal to each plant. Plant crown of plant one inch beneath soil surface and about every two to three feet apart. They can be left alone without dividing for ten to fifteen years. Each spring give a sidedressing of fertilizer. Give plants plenty of sunshine and water.

TERMS: Cash with order. All orders of \$3.00 and over shipped postpaid anywhere in the United States. On orders less than \$3.00 add 25 cents for postage and handling.

GUARANTEE: All plants guaranteed to be true to name, free from insect pest and disease. All plants are State inspected.

INVITATION: You are invited to join the Hemerocallis Society. Send \$3.00 Dues to THE HEMEROCALLIS SOCIETY, Secretary c/o The K. C. Life Ins. Co., Box 139, Kansas City 10, Missouri.
